

Andino UPS – Data sheet

Output:

- Voltage: 24V
- Current: 0.4A
- Wattage: 10W
- Backup time under 2 Watts: 3min 30s
- Backup time under full load: 39s

Input:

- 24V

Internals:

- Internal charge and power controller: [LTC3350](#)
- Arduino-compatible microcontroller with changeable firmware (Baud-Rate: 38400)

Power Out stages:
